APPENDIX 9	800 MHz Transition Administrator, LLC Fees and Expenses through December 31, 2009

OVERVIEW

The 800 MHz Transition Administrator, LLC (“TA”) provides its Quarterly Progress Report to the Federal Communications Commission (“FCC”) regarding the progress of the reconfiguration of the 800 MHz band for the quarter ended December 31, 2009. Pursuant to the FCC’s *Reconfiguration Orders*,¹ the TA, as the manager of the reconfiguration effort, is required to report on a quarterly basis the progress of band reconfiguration.²

Reconfiguration of Non-Border Stage 2 Licensees

The reconfiguration of non-border Stage 2 licensees continued to proceed at a steady pace during the fourth quarter of 2009. Licensees and Sprint Nextel completed negotiations on and submitted to the TA 11 Frequency Reconfiguration Agreements (“FRAs”) during the fourth quarter. Many of the remaining licensees without FRAs have large and complex systems and extensive interoperability requirements. The majority have submitted cost estimates and are in the FRA negotiation process.

In the implementation phase, non-border Stage 2 licensees retuned, reflashed, or replaced approximately 90,000 radios (first touches) in the fourth quarter. There were 32 FRAs for which non-border Stage 2 licensees completed their physical retunes in the fourth quarter. As of December 31, 2009, approximately half of the non-border Stage 2 licensees had completed implementation. The TA notes that prompt completion of implementation activities and release of old NPSPAC frequencies by licensees will speed the release of additional interleaved band

Sept. 10, 2004), *Second Erratum*, 19 FCC Rcd 19651 (2004), and *Third Erratum*, 19 FCC Rcd 21818 (2004) (“*Report and Order*”); “Commission Seeks Comment on *Ex Parte* Presentations and Extends Certain Deadlines Regarding the 800 MHz Public Safety Interference Proceeding,” *Public Notice*, 19 FCC Rcd 21492 (2004); *Supplemental Order and Order on Reconsideration*, 19 FCC Rcd 25120 (2004), *amended by Erratum*, WT Docket No. 02-55 (rel. Jan. 19, 2005) (“*Supplemental Order*”); *Memorandum Opinion and Order*, 20 FCC Rcd 16015 (2005); *Second Memorandum Opinion and Order*, 22 FCC Rcd 10467 (2007), *amended by Erratum*, WT Docket No. 02-55 (rel. July 26, 2007); *Third Memorandum Opinion and Order*, 22 FCC Rcd 17209 (2007); “FCC Announces Supplemental Procedures and Provides Guidance for Completion of 800 MHz Rebanding,” *Public Notice*, 22 FCC Rcd 17227 (2007) (“*September 12, 2007 Public Notice*”); *Second Report and Order*, 23 FCC Rcd 7605 (2008), *amended by Erratum*, WT Docket No. 02-55 (rel. May 28, 2008) (“*Second Report and Order*”); *Fourth Memorandum Opinion and Order*, 23 FCC Rcd 18512 (2008); *Fourth Memorandum Opinion and Order*, 24 FCC Rcd 2413 (2009) (collectively “*Reconfiguration Orders*”).

² 47 C.F.R. § 90.676(b)(3) (2008). The band reconfiguration program in non-border areas generally consists of two broad stages of activity: the clearing of 806-809 MHz/851-854 MHz (Channels 1-120) in Stage 1 and the relocation of Public Safety’s NPSPAC channel users to this vacated spectrum in Stage 2. There are two phases of reconfiguration for each of these stages – the planning and negotiation phase that results in a Frequency Reconfiguration Agreement between the licensee and Sprint Nextel and the implementation phase that consists of the physical retuning of the radio system. While the Canadian border reconfiguration is also occurring in two stages (Stage 1 is non-Public Safety and Stage 2 is Public Safety), it also includes clearing of channels in the 854-860 MHz range for Public Safety use and reconfiguration of frequencies in the 861-865 MHz range to separate ESMR systems into the higher portion of the band. The exact frequencies being reconfigured varies in each FCC-defined Canadian Border Region.

spectrum to public safety entities because Sprint Nextel's staged clearing of the interleaved band is tied to clearing of the old NPSPAC band.

The TA continued its efforts to assist licensees move through the implementation phase. The TA conducted a follow-up Implementation Planning Session in the Sacramento area of NPSPAC Region 6: Northern California during the fourth quarter. The TA conducts these Implementation Planning Sessions ("IPS") in which it works with licensees, vendors, and Sprint Nextel to develop regional implementation schedules that identify key milestones and dependencies associated with reconfiguration implementation activities. Licensees that have participated in IPS should continue to move forward with and complete their implementation activities in accordance with the regional schedule developed at the session. The TA continues to monitor and report on the progress of licensees' implementation activities.

Licensees that have completed physical retuning must complete, in a timely manner, all closing process activities required in their FRAs and outlined in the TA's published guidance. Reconfiguration is not complete until licensees have completed the closing process. Closing process activities include modification of FCC licenses to delete old frequencies, reconciliation of all loaned, replaced, and replacement equipment, Actual Cost Reconciliation ("ACR"), and the preparation, execution, and delivery of the closing documents, including an FRA Completion Certification. During the fourth quarter, 21 FRA Completion Certifications for non-border Stage 2 FRAs were submitted to the TA. Licensees and Sprint Nextel should complete ACR and closing activities in accordance with the timeframes suggested in the Actual Cost Reconciliation Fact Sheet, which was updated in December 2009.³ The TA monitors the closing process and will continue to track a licensee's reconfiguration until it has completed the closing process and submitted an FRA Completion Certification. The TA will report to the FCC regarding the status of licensees that have completed physical retuning, but have not promptly completed the closing process.

Reconfiguration of Canadian Border Region Licensees

Canadian border Stage 1 (Business, Industrial and Land Transportation ("B/ILT") and Specialized Mobile Radio ("SMR")) licensees have made substantial progress in negotiating FRAs, and the main activities for such licensees are now occurring in the implementation phase. Licensees and Sprint Nextel completed negotiations on and submitted to the TA two FRAs during the fourth quarter. As of December 31, 2009, 79 percent of the FRAs anticipated for Stage 1 licensees have been submitted to the TA. This has enabled licensees to proceed with implementation activities, and there were 18 FRAs for which Canadian border Stage 1 licensees completed their physical retunes in the fourth quarter. Certain Stage 1 licensees must relocate from their old frequencies in the lower portion of the 800 MHz band before NPSPAC licensees can move to their new frequencies.

Canadian border Stage 2 (NPSPAC and non-NPSPAC Public Safety) licensees continued to move forward with planning and negotiation activities in the fourth quarter. Nearly half of Stage 2 licensees have negotiated Planning Funding Agreements ("PFAs"). These licensees are

³ The ACR Fact Sheet is available at http://www.800TA.org/content/resources/ACR_Fact_Sheet.pdf.

engaged in planning activities and some have entered FRA negotiations. Stage 2 licensees and Sprint Nextel completed negotiations on and submitted to the TA 20 FRAs during the fourth quarter. In the implementation phase, there were 6 FRAs for which Canadian border Stage 2 licensees completed their physical retunes in the fourth quarter. The TA conducted Interoperability and Planning Workshops for Stage 2 licensees in NPSPAC Region 21: Michigan in November 2009 and in NPSPAC Region 33: Ohio in January 2010 to facilitate interdependency discussions between licensees in the region and determine how to coordinate and address interoperability during reconfiguration. Canadian border licensees are required to complete reconfiguration by April 14, 2011.

Reconfiguration of Mexican Border Licensees

The band plan for the U.S.-Mexico border region is still under development. Accordingly, the FCC issued a Public Notice on December 31, 2009, modifying the schedule and extending the negotiation period until April 1, 2010 for non-NPSPAC (Stage 1) and NPSPAC (Stage 2) licensees in the U.S.-Mexico border region.⁴ The FCC has encouraged licensees affected by the Mexican border region to engage in planning and negotiation activities to the extent that they are not frequency-dependent and would not result in unnecessary duplication of costs.⁵ Additional information is available in the TA's Non-Frequency Dependent Activities Fact Sheet.⁶

Financial True-Up Date

On November 2, 2009, the TA filed with the FCC's Public Safety and Homeland Security Bureau ("PSHSB") a report recommending that the 800 MHz reconfiguration financial reconciliation "true-up" deadline be extended from December 31, 2009 until June 30, 2010.⁷ The TA proposed to file a report with the PSHSB by May 31, 2010 with its recommendation on whether the true-up should be conducted as of June 30, 2010 or be further postponed. On December 23, 2009, the PSHSB released an Order postponing the true-up date from December 31, 2009 to June 30, 2010 and requiring the TA to file a report by May 31, 2010 with its recommendation regarding the true-up.⁸

⁴ See "Public Safety and Homeland Security Bureau Extends 800 MHz Rebanding Negotiation Period for Wave 4 Border Area NPSPAC and Non-NPSPAC Licensees Along the U.S.-Mexico Border," *Public Notice*, 24 FCC Rcd 14774 (2009) ("*Mexican Border Public Notice*").

⁸ See Improving Public Safety Communications in the 800 MHz Band, *Order*, 24 FCC Rcd 14642 ¶ 1 (2009) ("*True-up Order*").

Conclusion

The 800 MHz band reconfiguration program continued to move forward in 2009. A total of 218 FRAs were negotiated and submitted to the TA in 2009 for non-border and Canadian border licensees in Stages 1 and 2. There were 183 FRAs for which non-border and Canadian border licensees in Stages 1 and 2 completed their physical retunes in 2009.

In the past year, non-border Stage 2 licensees and Sprint Nextel completed negotiations on and submitted to the TA 89 FRAs. This raised the percentage of FRAs submitted to the TA from 83 percent as of December 31, 2008 to 93 percent as of December 31, 2009. The main activities for non-border Stage 2 licensees are occurring in the implementation phase. Non-border Stage 2 licensees retuned, reflashed, or replaced approximately 435,000 radios (first touches) in 2009, raising the total number to approximately 790,000 radios (first touches) as of December 31, 2009. There were 127 FRAs for which non-border Stage 2 licensees completed their physical retunes in 2009. This raised the percentage of FRAs with physical retune complete from 34 percent as of December 31, 2008 to 49 percent as of December 31, 2009. Several large systems have a clear impact on the implementation schedules of other licensees, and the TA continues to conduct IPS to ensure that schedule dependencies between licensees are pro-actively addressed. The TA conducted 11 IPS in 2009, which were attended by 164 licensees. As of December 31, 2009, the TA had conducted 39 IPS in 28 NPSPAC regions, which were attended by 554 licensees, operating approximately 1.3 million radios. In addition, licensees are proceeding with closing activities, and there were 99 FRA Completion Certifications for non-border Stage 2 FRAs submitted to the TA in 2009. This raised the percentage of FRAs with Completion Certifications submitted from 12 percent as of December 31, 2008 to 24 percent as of December 31, 2009.

Reconfiguration is well underway for Canadian border licensees at the mid-point in their 30-month transition period. In Canadian border Stage 1, licensees and Sprint Nextel completed negotiations on and submitted to the TA 67 FRAs in 2009. This raised the percentage of FRAs submitted to the TA to 79 percent as of December 31, 2009. Licensees have moved forward with implementation activities, and there were 36 FRAs for which Canadian border Stage 1 licensees completed their physical retunes in 2009. This raised the percentage of FRAs with physical retune complete to 42 percent as of December 31, 2009. Reconfiguration of Canadian border Stage 1 licensees is almost halfway complete.

Canadian border Stage 2 licensees focused on planning and negotiation activities in 2009. In the past year, licensees and Sprint Nextel completed negotiations on and submitted to the TA 31 PFAs, raising the total to 60 PFAs as of December 31, 2009. Stage 2 licensees and Sprint Nextel completed negotiations on and submitted to the TA 60 FRAs in 2009. This raised the percentage of FRAs submitted to the TA to 47 percent as of December 31, 2009. In the implementation phase, there were 8 FRAs for which Canadian border Stage 2 licensees completed their physical retunes in 2009. This raised the percentage of FRAs with physical retune complete to 6 percent as of December 31, 2009.

I. PROGRAM-WIDE SNAPSHOT AND RECENT DEVELOPMENTS

This section provides a program-wide snapshot that summarizes the status of the 800 MHz band reconfiguration program. It describes two measures of program progress: Frequency Reconfiguration Agreement negotiations and reconfiguration implementation. It also discusses recent developments in the program, identifies program-wide issues, and describes specific actions that the FCC and the TA have taken to address issues identified to date.

A. Program Wide Snapshot

1. Frequency Reconfiguration Agreement Negotiations

The TA generally measures the progress of Frequency Reconfiguration Agreement negotiations in two ways: (1) the number of *FRAs* that have been negotiated and agreed to between incumbent licensees and Sprint Nextel and submitted to the TA; and (2) the number of *call signs* included in those FRAs.

An FRA specifies the reconfiguration activities and related costs for each licensee as well as the frequencies to be cleared. The bar chart below depicts the number of non-border FRAs that have been negotiated and submitted to the TA for Stage 1 (Channels 1-120 and Southeast ESMR channels) licensees and Stage 2 (NPSPAC and Public Safety Expansion Band) licensees.

Chart 1: Non-border FRAs Submitted to the TA as of December 31, 2009⁹

- Stage 1: 99 percent of non-border FRAs have been submitted to the TA
- Stage 2: 93 percent of non-border FRAs have been submitted to the TA

⁹ Sprint Nextel is the data source for the number of expected FRAs. The estimate of total FRAs expected does not include FRAs for licensees affected by the international border areas for Canada and Mexico.

For the non-border portion of the program, 1,723 FRAs (97 percent) have been submitted to the TA out of a total of 1,785 FRAs expected for non-border licensees in Stages 1 and 2.

Another indication of progress is the number of FCC licenses (each license has a unique call sign) included in FRAs. The chart below shows the number of call signs with frequencies in the Channels 1-120 and NPSPAC bands included in FRAs submitted to the TA.

Chart 2: Call Signs in Submitted FRAs by Band¹⁰

The number of outstanding Channels 1-120 call signs not yet in FRAs reflects the material number of call signs to be reconfigured that are located in, or affected by, the Canadian and Mexican border areas. For NPSPAC, the difference is again the border factor (both Canadian and Mexican), as well as an indication that a number of the outstanding non-border FRAs are for large systems with multiple call signs.

2. Reconfiguration Implementation

The TA generally measures the status of reconfiguration implementation, or physical retuning, progress in two ways: (1) the number of *FRAs* for which physical retuning is complete; and (2) the number of *call signs* that Sprint Nextel reports as being cleared by licensees.¹¹

The bar chart below depicts the number of non-border FRAs for Stages 1 and 2 licensees for which Sprint Nextel has reported that physical retuning is complete.

¹⁰ This chart includes call signs within the Canadian and Mexican border regions. Data is based on the FCC's Universal Licensing System ("ULS") database. This chart does not include Expansion Band call signs.

¹¹ Cleared means that the licensee has retuned its base stations to its new channel assignments and commenced system operations on the new channels. Maps 2 and 3 and Appendix 2 have information on clearing by call sign.

Chart 3: Non-border FRAs with Physical Retuning Complete as of December 31, 2009

With Sprint Nextel reporting that physical retuning is complete for 97 percent of non-border Channels 1-120 FRAs, Channels 1-120 clearing is nearing completion. Furthermore, 69.6 percent of the Stage 1 Channels 1-120 site-specific call signs were reported by Sprint Nextel as being cleared by licensees as of December 31, 2009. The difference between the percentages of *call signs* compared to the percentages of *FRAs* is attributable to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include call signs in border areas.

NPSPAC reconfiguration implementations often involve complex system designs and interoperability requirements among numerous licensees in a region and generally require more time and coordination than was needed for Stage 1. As of December 31, 2009, there were 423 FRAs (49 percent) for which non-border Stage 2 licensees had completed their physical retunes and transitioned to their new channels. 30 percent of Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees as of December 31, 2009. The retuning of base stations to a licensee's new channel assignments and commencement of system operations on the new channels is a significant milestone because it means that the main goal of the reconfiguration process – separating Public Safety and commercial cellular operations – has been achieved.

B. Recent Developments

1. Financial True-Up Date

In a June 24, 2009 Order, the PSHSB postponed the 800 MHz reconfiguration financial reconciliation “true-up” deadline from July 1, 2009 to December 31, 2009 and required the TA to file a report by November 2, 2009, with its recommendation whether the true-up should occur on December 31, 2009 or be further postponed.

On November 2, 2009, the TA filed a report recommending that the true-up deadline be extended from December 31, 2009 until June 30, 2010.¹² After noting that there has been an incremental increase in the 800 MHz reconfiguration expenditures since June 2009, the TA stated that a true-up as of December 31, 2009 would fail to take into account a large portion of Sprint Nextel's eventual cost obligation. The TA proposed to file a report with the PSHSB by May 31, 2010 with its recommendation: (1) whether reconfiguration has made sufficient progress that conducting the true-up as of June 30, 2010 would be appropriate; or (2) whether the "true-up" deadline should be extended for an additional period.

On December 23, 2009, the PSHSB released an Order postponing the true-up date from December 31, 2009 to June 30, 2010.¹³ The PSHSB required the TA to file a report by May 31, 2010, with its recommendation on whether the true-up should occur on June 30, 2010 or be further postponed. In the event that the true-up is conducted based on expenditures as of June 30, 2010, the PSHSB directed the TA to submit its final true-up report by December 31, 2010.

2. Requests for Waiver of Rebanding Completion Deadline

Non-border licensees that do not complete the physical reconfiguration of their systems by their waiver date previously granted by the PSHSB are required to request additional time from the PSHSB by filing a supplemental request for waiver of the rebanding completion deadline. Pursuant to the PSHSB's June 9, 2009 Order¹⁴ and June 10, 2009 Public Notice,¹⁵ many non-border licensees were required to file a supplemental request for waiver by July 9, 2009 or by October 1, 2009. Licensees were required to update the information in their prior requests for waiver and provide a revised reconfiguration timetable, including proposed milestone dates for subscriber unit deployment, infrastructure retuning, system cut-over, and post-cutover modifications. The TA has created a webpage that provides information on the requests for waiver received by the TA. The link to this page can be found on the TA's website at <http://www.800TA.org/content/resources/tools.asp>. The TA received a total of 34 request for waiver filings during the fourth quarter. As of December 31, 2009, the TA received a total of 1,273 request for waiver filings, which includes requests for interim waiver,¹⁶ standard requests for waiver, and supplemental requests for waiver.¹⁷

¹² See *TA True-up Letter*.

¹³ See *True-up Order*.

¹⁴ See *Improving Public Safety Communications in the 800 MHz Band; Supplemental Requests for Waiver of the June 26, 2008 Rebanding Deadline*, Order, 24 FCC Rcd 7761 (2009) ("*June 9, 2009 Waiver Order*").

¹⁵ See "Public Safety and Homeland Security Bureau Provides Additional Guidance for Submission of Supplemental Requests for Waiver of June 26, 2008 Deadline for Completion of 800 MHz Rebanding," *Public Notice*, 24 FCC Rcd 7831 (2009).

¹⁶ Licensees that were unable to propose a specific implementation timetable because they had not completed FRA negotiations as of the March and April 2008 filing deadlines filed requests for "interim" waiver.

¹⁷ Supplemental filings for interim or standard requests for waiver are made by licensees to update requested dates or to provide additional information regarding their original request for waiver filing.

Licensees are expected to complete their reconfiguration activities in accordance with the implementation schedule proposed in their request for waiver. If a licensee cannot complete rebanding by the waiver date it requested in its supplemental request for waiver or by the waiver date granted by the PSHSB, it must file a further request for waiver with the PSHSB.

3. Vacated Interleaved Band Channels and NPSPAC Clearing

The FCC tasked the TA with monitoring the NPSPAC clearing process in its October 30, 2008 Order.¹⁸ The FCC's *Interleaved Order* also required Sprint Nextel to relinquish all of its non-border spectrum in the interleaved band (809-815/854-860 MHz) by March 31, 2010. Sprint Nextel cleared channels in the 809-809.5/854-854.5 MHz band in non-border NPSPAC regions, and this spectrum was made available to Public Safety licensees, beginning on January 28, 2009.¹⁹ Based on additional clearing of channels in the old NPSPAC band in certain NPSPAC regions, the PSHSB announced on October 28, 2009 that additional channels have been, or will be, relinquished by Sprint Nextel in the 809.5-815/854.5-860 MHz band in certain NPSPAC regions.²⁰ Those channels were made available to Public Safety licensees starting on December 2, 2009. On January 27, 2010, Sprint Nextel filed a request for waiver of the March 31, 2010 deadline in 21 NPSPAC Regions and proposed to relinquish additional interleaved channels in those regions in accordance with the thresholds for staged interleaved spectrum clearing set forth in the FCC's *Interleaved Order*.²¹

As NPSPAC licensees modify their licenses to clear channels in the old NPSPAC band and reach certain clearing benchmarks in a region, Sprint Nextel will vacate additional interleaved band spectrum in that region. The TA is monitoring the clearing of channels in the old NPSPAC band. During the fourth quarter, five NPSPAC regions reached higher clearing stages, indicating incremental interleaved band channels can be released as part of the vacated spectrum process established by the FCC.²² The following map contains information about the status of clearing of channels in the old NPSPAC band in each region, as reflected in the FCC's ULS database.

¹⁸ See Improving Public Safety Communications in the 800 MHz Band; Relinquishment By Sprint Nextel of Channels in the Interleaved, Expansion, and Guard Bands, *Order*, 23 FCC Rcd 15966 ¶ 18 (2008) ("*Interleaved Order*").

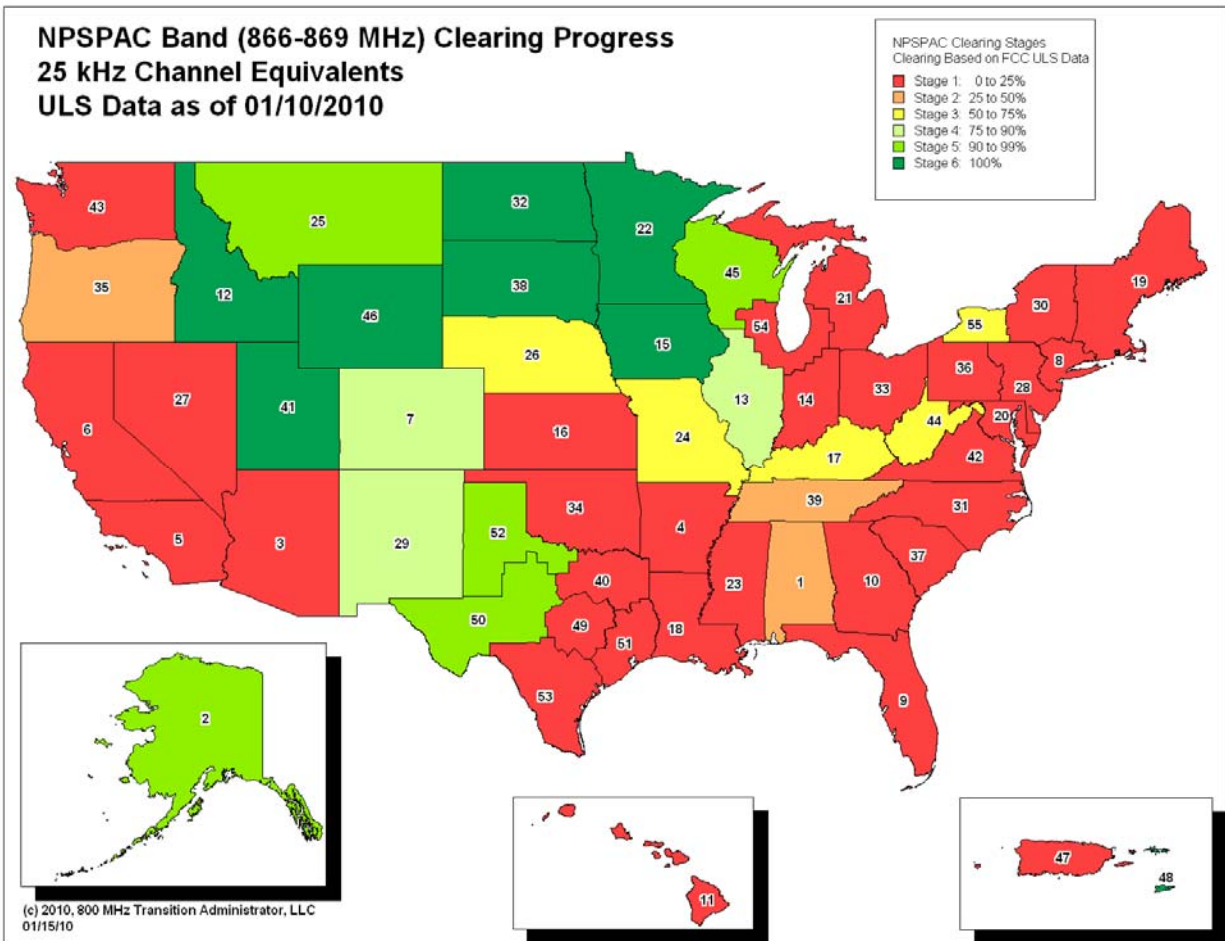

¹⁹ See "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Channels Relinquished by Sprint Nextel Corporation in the 809-809.5/854-854.5 MHz Band," *Public Notice*, 23 FCC Rcd 18343 (2008).

²⁰ See "Public Safety and Homeland Security Bureau Announces Application and Licensing Procedures for Certain Channels Relinquished by Sprint Nextel Corporation in the 809.5-815/854.5-860 MHz Band," *Public Notice*, 24 FCC Rcd 13236 (2009).

²¹ See Letter from Lawrence R. Krevor, Sprint Nextel Corporation, to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Jan. 27, 2010).

²² The five regions are NPSPAC Region 7: Colorado (stage 3 to stage 4); NPSPAC Region 13: Illinois 13 (stage 2 to stage 4); NPSPAC Region 15: Iowa (stage 5 to stage 6); NPSPAC Region 29: New Mexico (stage 3 to stage 4); and NPSPAC Region 46: Wyoming (stage 4 to stage 6).

Map 1: NPSPAC Clearing Progress as of December 31, 2009

Additional information is available in Appendix 2.

4. U.S.-Mexico Border Region

The band plan for the U.S.-Mexico border region is still under development. Accordingly, the FCC issued a Public Notice on December 31, 2009, modifying the schedule for non-NPSPAC (Stage 1) and NPSPAC (Stage 2) licensees in the U.S.-Mexico border region.²³ The FCC extended the negotiation period until April 1, 2010 and postponed the start of the mediation period until April 2, 2010 for such licensees. The FCC also extended the filing freeze on new applications in the U.S.-Mexico border region until May 13, 2010. Extending the negotiation period for these licensees is expected to alleviate administrative burdens on licensees, avoid unnecessary rebanding expenditures, and provide additional time for resolution of border issues and issuance of frequency designations by the TA.

²³ See Mexican Border Public Notice.

During the extended negotiation periods, the FCC has encouraged Wave 4 licensees affected by the Mexican border region to engage in planning and negotiation activities to the extent that they are not frequency-dependent and would not result in unnecessary duplication of costs.²⁴ If planning funding is required, licensees should submit a Request for Planning Funding (“RFPF”) to the TA and negotiate a PFA with Sprint Nextel. Licensees may submit an RFPF prior to receiving replacement frequencies. As of December 31, 2009, 13 PFAs were submitted to the TA for licensees in or adjacent to the Mexican border region.

²⁴ *See id.*

II. QUARTERLY UPDATE

This section highlights the key areas within each stage and provides financial and support information about the program.

A. Update by Stage and Wave

This section presents further detail about the status of negotiations and reconfiguration implementation for licensees. The status of implementation for Stage 1 systems has a direct effect on the pace of reconfiguration for Stage 2 systems. Stage 1 licensees must be relocated off their frequencies in the lower 1-120 channel portion of the 800 MHz band before Stage 2 NPSPAC licensees can move to their new frequencies in that portion of the 800 MHz band. This interdependency of reconfiguration progress between Stages 1 and 2 is consistent across all four waves.

1. Stage 1 (Channels 1-120)

This section presents information about non-border Stage 1 licensees.

a. Planning and Negotiations

Most Stage 1 licensees included planning costs (if any) in their FRAs, but some negotiated Planning Funding Agreements with Sprint Nextel. As of December 31, 2009, 53 PFAs, with a total contract value, including amendments, of \$7.5 million, were submitted to the TA for non-border Stage 1 licensees.

The negotiation of FRAs for non-border Stage 1 licensees is virtually completed. As of December 31, 2009, 912 FRAs (99 percent) have been submitted to the TA out of the 914 FRAs anticipated for Stage 1 licensees. The contract value of these FRAs, including amendments, totals \$78.4 million. Appendix 1A provides additional information about the status of FRA negotiations for non-border Channels 1-120 licensees.

In Stage 1, there were no mediation dockets (or “cases”) pending as of December 31, 2009. As of December 31, 2009, no Stage 1 mediations were the subject of Recommended Resolutions pending before the FCC for *de novo* review.

b. Reconfiguration Implementation

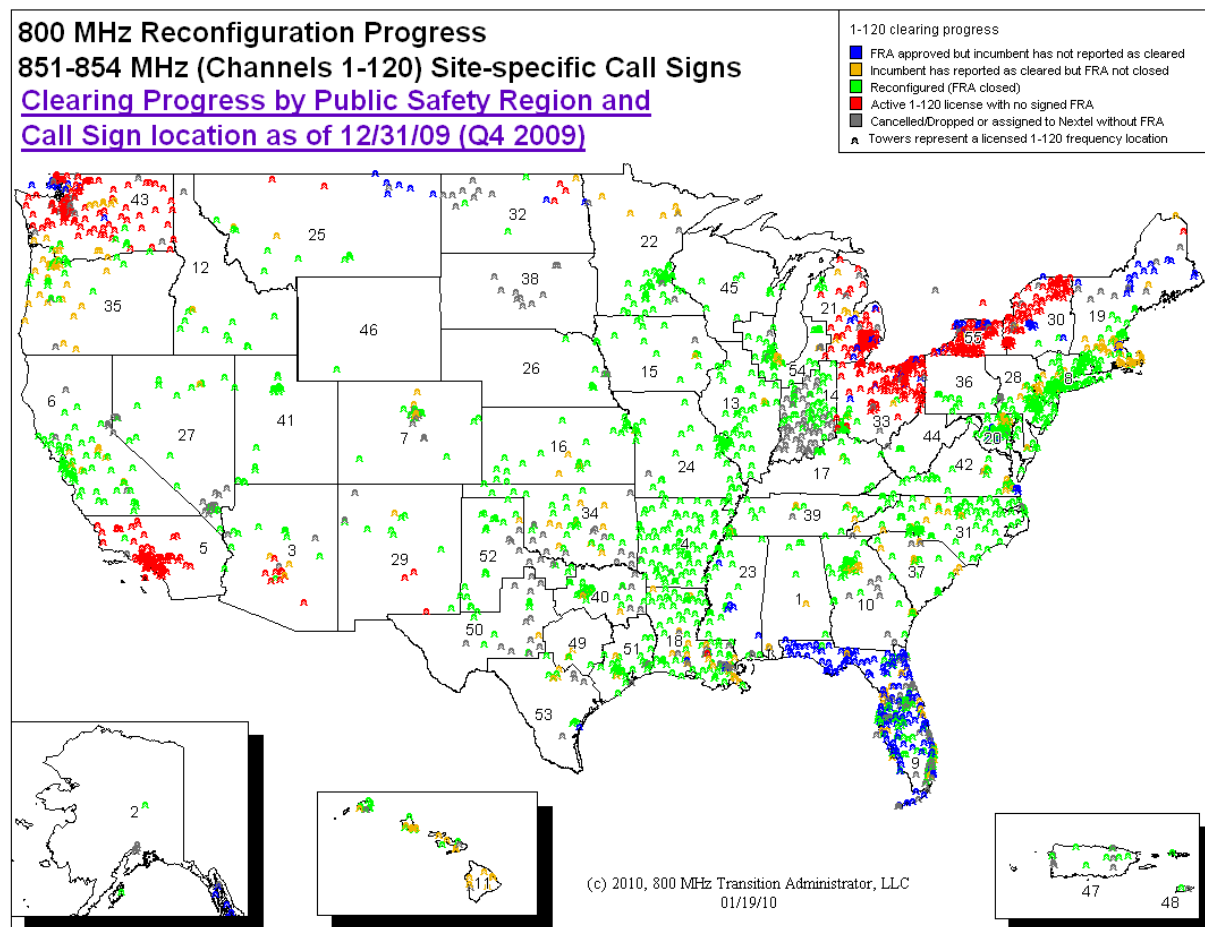

As of December 31, 2009, Sprint Nextel reported that physical retuning is complete for 887 Stage 1 FRAs out of the 914 FRAs anticipated for Stage 1, which is 97 percent of non-border Channels 1-120 FRAs (an increase from 96.8 percent as of September 30, 2009). Certain Public Safety licensees in Stage 1 have elected to retune their Stage 1 facilities along with their Stage 2 facilities.

As of December 31, 2009, 69.6 percent (up from 68.1 percent as of September 30, 2009) of the Stage 1 Channels 1-120 site-specific call signs were reported by Sprint Nextel as being cleared by licensees. The difference between the percentages of call signs compared to the

percentages of FRAs is due to the FRA statistics not including agreements in border areas, while the call sign statistics do include border area call signs in border areas, with the majority of outstanding call signs being in the border areas as shown in Map 2. As of December 31, 2009, there were 33 NPSPAC regions that reported that 100 percent of the Channels 1-120 call signs were cleared.

The following map shows the progress of clearing Channels 1-120 to allow relocation of the NPSPAC band, with material progress in all areas of the country outside the areas affected by international borders.

Map 2: Channels 1-120 Locations and Reconfiguration Status, by NPSPAC Region as of December 31, 2009²⁵

²⁵ The licensee clearing information is provided by Sprint Nextel. Some regions adjacent to international borders will not reach 100 percent until revised border area band plans are available. Locations noted on the map are based upon ULS data regarding Channels 1-120 licensing as of November 2004.

2. Stage 2 (NPSPAC and Public Safety Expansion Band)

This section presents information about non-border Stage 2 licensees.

a. Planning and Negotiations

In Stage 2, nearly half of the licensees sought planning funding and negotiated PFAs. As of December 31, 2009, 427 PFAs, with a total contract value, including amendments, of \$72.9 million, were submitted to the TA for non-border Stage 2 licensees.

Steady progress continues to be made in the negotiation of FRAs for Stage 2 licensees. During the fourth quarter of 2009, parties completed negotiations on and submitted to the TA an additional 11 Stage 2 FRAs. As shown in the table below, as of December 31, 2009, 811 FRAs (93 percent) have been submitted to the TA out of the 871 FRAs anticipated for non-border Stage 2 licensees.²⁶ The contract value of these FRAs, including amendments, totals \$612.5 million.

Table 1: Status of Reconfiguration for Stage 2 (NPSPAC and Public Safety Expansion Band) Licensees as of December 31, 2009 (milestones achieved by number of FRAs)²⁷

Wave	Stage 2 Anticipated FRAs*	FRA Negotiations and Approval			Reconfiguration Implementation				
		FRAs Submitted to TA	FRAs Approved by TA	% of Anticipated FRAs Approved by TA	# of FRAs with Physical Retunes Reported as Completed	% of Anticipated FRAs with Physical Retune Reported as Completed	Completion Certifications Submitted to TA	Completion Certifications Verified by TA	% of Anticipated FRAs with Completion Certifications Verified by TA
Wave 1	360	330	330	92%	182	51%	88	87	24%
Wave 2	228	217	217	95%	131	57%	79	78	34%
Wave 3	236	219	218	92%	84	36%	28	28	12%
Wave 4	47	45	44	94%	26	55%	10	10	21%
Total	871	811	809	93%	423	49%	205	203	23%

* This table does not include any estimate of deals that will include call signs in or affected by the FCC-defined border areas.

²⁶ One FRA that was included in the count of FRAs submitted to the TA in the Quarterly Progress Report for the Quarter Ended September 30, 2009 has been recategorized as a border area FRA.

²⁷ Sprint Nextel is the data source for the estimated number of anticipated FRAs in column 2 and the number of FRAs with physical retunes reported as completed in column 6. The figures have not been verified by the TA. Any changes to the number of anticipated FRAs from previous Quarterly Progress Reports are the result of how Sprint Nextel structures deals with licensees (*i.e.*, deals cancelled or consolidated). For Wave 3, Stage 2, the number of expected FRAs will increase as additional FRAs are reached with Wave 3 Southeast ESMR Band licensees who were deferred from Wave 3, Stage 1 to Wave 3, Stage 2 and those deals are added to the count. Given that some FRAs noted in the table are for licensees with mobile-only systems, there will be a difference between the number of FRAs and the number of FRAs reporting frequencies cleared.

The remaining licensees without FRAs are: (1) in the planning process, in which they are conducting planning activities pursuant to a PFA and working on preparing a cost estimate for their reconfiguration; (2) in the process of negotiating an FRA with Sprint Nextel; or (3) the subject of Recommended Resolutions pending before the FCC for *de novo* review. Some of these licensees have reached verbal agreement on, but have not yet executed, an FRA.

The table below provides Stage 2 status information in terms of the number of call signs that have achieved particular milestones.

Table 2: Status of Reconfiguration for Licensees in Stage 2 (NPSPAC and Public Safety Expansion Band) as of December 31, 2009 (milestones achieved by number of call signs)

Wave	Stage 2 Call Signs *	FRA Negotiations and Approval			Reconfiguration Implementation				
		# in FRAs Submitted to TA	# in FRAs Approved by TA	% in FRAs Approved by TA	# Reported as Cleared by Licensee	% Reported as Cleared by Licensee	Completion Certifications Submitted to TA	Completion Certifications Verified by TA	% with Completion Certifications Verified by TA
Wave 1	2202	1950	1780	81%	1178	53%	116	114	5%
Wave 2	948	837	652	69%	341	36%	140	137	14%
Wave 3	1176	1032	742	63%	293	25%	46	46	4%
Wave 4	1959	392	313	16%	62	3%	20	19	1%
Total	6285	4211	3487	55%	1874	30%	322	316	5%

* Includes call signs in the FCC-defined international border areas.

(i) **Wave 1**

Wave 1, Stage 2 is the largest of the NPSPAC channel reconfiguration waves. As shown in Table 1 above, as of December 31, 2009, approximately 92 percent of the FRAs expected for Wave 1, Stage 2 have been approved by the TA.

The Wave 1, Stage 2 mediation period began on November 1, 2006. As of December 31, 2009, of the 337 mediation dockets opened for Wave 1, Stage 2 licensees, 310 mediation dockets had been resolved (an increase from 308 resolved as of September 30, 2009). The parties in 18 mediations had negotiated PFAs and were in various stages of planning; one of these had reached agreement but had not yet executed an FRA. Eight mediation dockets were the subject of Recommended Resolutions pending before the FCC for *de novo* review.

(ii) **Wave 2**

As shown in Table 1 above, as of December 31, 2009, approximately 95 percent of the FRAs expected for Wave 2, Stage 2 have been approved by the TA.

The Wave 2, Stage 2 mediation period began on February 1, 2007. As of December 31, 2009, of the 233 mediation dockets opened for Wave 2, Stage 2 licensees, 218 mediation dockets had been resolved (an increase from 217 resolved as of September 30, 2009). The parties in 12 mediations had negotiated PFAs and were in various stages of planning. The parties in three mediation dockets were in the process of negotiating FRAs following *de novo* review by the FCC.

(iii) **Wave 3**

Besides NPSPAC licensees, Wave 3, Stage 2 includes certain licensees with Southeast ESMR Band frequencies that were deferred from Wave 3, Stage 1 at the licensee's request.²⁸ As shown in Table 1 above, as of December 31, 2009, approximately 93 percent of the FRAs expected for Wave 3, Stage 2 have been approved by the TA.

The Wave 3, Stage 2 mediation period began on May 1, 2007. As of December 31, 2009, of the 272 mediation dockets opened for Wave 3, Stage 2 licensees, 243 mediation dockets had been resolved (an increase from 237 resolved as of September 30, 2009).²⁹ The parties in 27 mediations had negotiated PFAs and were in various stages of planning; four had reached agreement but had not yet executed FRAs. One mediation docket was the subject of a Recommended Resolution pending before the FCC for *de novo* review.

(iv) **Wave 4**

As shown in Table 1 above, as of December 31, 2009, approximately 94 percent of the non-border area FRAs expected for Wave 4, Stage 2 have been approved by the TA. The expected FRAs for Wave 4, Stage 2 licensees with systems located in, or affected by, the international border areas with Canada and Mexico are not included in the FRA statistics for Wave 4.

The Wave 4, Stage 2 mediation period for non-border area licensees began on August 1, 2007. As of December 31, 2009, of the 66 mediation dockets opened for Wave 4, Stage 2 licensees, 64 mediation dockets had been resolved (an increase from 63 resolved as of September 30, 2009). The parties in one mediation had negotiated a PFA and were in various stages of planning. No mediations were pending before the FCC for *de novo* review.

b. **Reconfiguration Implementation**

Non-border Stage 2 licensees continue to make progress with their implementation activities.

²⁸ Wave 3, Stage 1 licensees whose Wave 3 ESMR Negotiation Deferral Requests were granted in June 2006 had their negotiations and reconfiguration implementation deferred to Wave 3, Stage 2.

²⁹ The difference between the number of mediation dockets and the number of expected FRAs for Wave 3, Stage 2 is largely due to certain deals with Wave 3 Southeast ESMR Band licensees who were deferred from Wave 3, Stage 1 to Wave 3, Stage 2 not being included in the number of expected FRAs. The number of expected FRAs for Wave 3, Stage 2 will increase as additional FRAs are reached with such licensees and those deals are added to the count.

(i) **Implementation Planning Sessions**

One of the TA's methods for facilitating implementation activities has been to conduct regional Implementation Planning Sessions ("IPS" or "sessions"). These sessions bring together NPSPAC and interoperable Expansion Band licensees, their equipment vendors, technical consultants, and Sprint Nextel to develop consolidated implementation schedules. The FCC requires licensees that have not completed reconfiguration to participate in IPS in their region, if offered.³⁰

During the sessions, the TA works with licensees to develop implementation schedules for the regions that identify key milestones and dependencies associated with reconfiguration implementation activities. This is particularly important because many FRAs for NPSPAC licensees do not contain firm implementation dates. The sessions help licensees adjust implementation schedules to deal with complicated interconnections and interdependencies of shared networks – particularly regarding setting dates for retuning mutual aid channels used by neighboring municipalities. IPS have also been successful in enabling parties to reach an understanding on the timing of clearing and surrendering frequencies for those licensees that are ready to transition to the new channels.

During the fourth quarter, the TA conducted a follow-up session in the Sacramento area of NPSPAC Region 6: Northern California. As of December 31, 2009, the TA had conducted 39 IPS in 28 NPSPAC regions, which were attended by 554 licensees, operating approximately 1.3 million radios.³¹ Licensees that have participated in IPS should continue to move forward with and complete their implementation activities in accordance with the regional schedule developed at the session.

The TA will continue to hold IPS for NPSPAC regions in all waves, and follow-up sessions when needed. The TA continues to evaluate the remaining non-border NPSPAC regions to determine when it will be appropriate to schedule IPS in those regions. In some regions, the TA will hold IPS to develop an initial regional schedule, with the understanding that follow-up IPS may be necessary. In regions where accelerating IPS is not viable, or where the TA has determined that a session may not be necessary, the TA will communicate with licensees to document the interoperability environment, dependencies, and any other relevant issues and develop a regional schedule.

(ii) **Reconfiguration of Subscriber Equipment**

A key component of reconfiguration implementation is the retuning, reflashing, and/or replacement of subscriber equipment. Non-border Stage 2 licensees retuned, reflashed, or

³⁰ See *June 9, 2009 Waiver Order*, 24 FCC Rcd 7765 ¶ 9; see also *September 12, 2007 Public Notice*, 22 FCC Rcd 17230 (stating that NPSPAC licensees "are expected to participate" in IPS).

³¹ The TA conducted 17 IPS in Wave 1 NPSPAC regions attended by 177 licensees, 11 IPS in Wave 2 NPSPAC regions attended by 167 licensees, and 11 IPS in Wave 3 NPSPAC regions attended by 210 licensees. The TA is gathering and analyzing information to assess future IPS for Wave 4.

replaced approximately 90,000 radios (first touches) in the fourth quarter of 2009, raising the total number to approximately 790,000 radios (first touches) as of December 31, 2009.

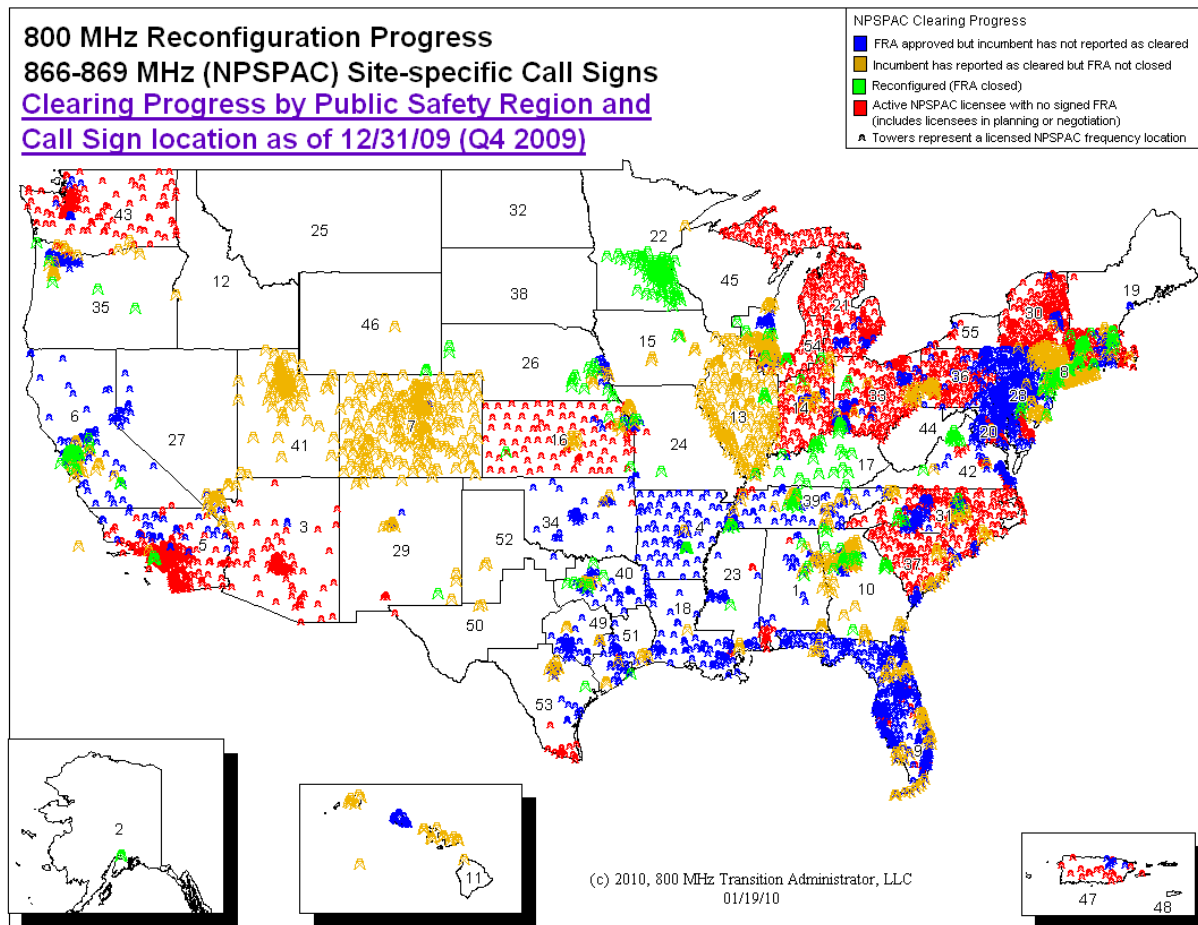

(iii) **Infrastructure Retuning and System Cutover**

Another significant milestone in the implementation process is the retuning of base stations to the licensee's new channel assignments and commencement of system operations on the new channels. During the fourth quarter of 2009, there were an additional 32 Stage 2 FRAs for which licensees reported their physical retunes as complete. Of the 871 non-border FRAs expected for Stage 2, there were 423 FRAs as of December 31, 2009 for which licensees had completed their physical retunes and transitioned to their new channels. This does not consider licensees with post-cutover subscriber unit second touches or other technical work. As of December 31, 2009, physical retuning was complete for 49 percent of non-border Stage 2 FRAs (an increase from 45 percent from September 30, 2009).

As of December 31, 2009, 29 percent (up from 24 percent as of September 30, 2009) of Stage 2 call signs were reported by Sprint Nextel as being cleared by licensees, which includes call signs in the border areas. The difference between the numbers by percentages of call signs compared to the numbers by percentages of FRAs is again due to the fact that the FRA statistics do not include agreements in border areas, while the call sign statistics do include border area call signs.

The following map graphically depicts a geographic perspective of NPSPAC reconfiguration progress, as of December 31, 2009, by licensed NPSPAC locations. Progress on Expansion Band clearing is detailed in Appendix 2.

Map 3: NPSPAC Locations and Reconfiguration Status, by NPSPAC Region as of December 31, 2009³²

3. Implementation Schedule Implications

The TA has identified below certain regions where one or more key licensees and Sprint Nextel have not yet reached agreement on an FRA, and where the resulting delay is impeding program progress and delaying implementation by other licensees within their region and, in some cases, outside their region due to interoperability and dependencies between licensees. In regions with extensive interoperability, licensees with FRAs are waiting for the trailing licensees to complete FRA negotiations so that all licensees in the region can coordinate their implementation schedules in order to preserve interoperability and mutual aid operations. The TA encourages all parties to work to complete the steps necessary to allow appropriate dialogue

³² This map shows frequency clearing as reported by the licensee to Sprint Nextel. Licensees generally report clearing before they file license modifications to delete cleared frequencies. Map 1 reflects clearing based on ULS licensing data, which is the basis for determining the release of additional interleaved band spectrum by Sprint Nextel.

on proposed costs and to reach agreement. Several regions that appeared on this list in the third quarter of 2009 have been removed from the list.

a. **Wave 1**

- Region 6: Northern California
- Region 19: New England
- Region 28: Eastern Pennsylvania (east of Harrisburg, southern New Jersey, & Delaware)
- Region 42: Virginia

In addition, a delay in the clearing of Channels 1-120 by one licensee in Region 19 has delayed the implementation of at least three other licensees.

b. **Wave 2**

- Region 16: Kansas

c. **Wave 3**

- Region 1: Alabama
- Region 9: Florida
- Region 10: Georgia
- Region 18: Louisiana
- Region 23: Mississippi
- Region 31: North Carolina
- Region 37: South Carolina

4. Canadian Border Regions

The 30-month transition period for reconfiguration of licensees in the U.S.-Canada border regions began on October 14, 2008 and will end on April 14, 2011.³³ The TA's Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions ("Implementation Plan") established two stages for the reconfiguration of Canadian border licensees.³⁴ Stage 1 includes non-Public Safety licensees, such as B/ILT and

³³ See "Public Safety and Homeland Security Bureau Announces that the 30-Month Transition Period for 800 MHz Band Reconfiguration in Regions Along the U.S.-Canada Border will Commence on October 14, 2008," *Public Notice*, 23 FCC Rcd 14877 (2008) ("Canadian Border Public Notice").

³⁴ See 800 MHz Transition Administrator, LLC, "Implementation Plan and Timetable for the Reconfiguration of the 800 MHz Band in the U.S.-Canada Border Regions," WT Docket No. 02-55 (filed Oct. 1, 2008), available at http://www.800TA.org/content/PDF/other/Implementation_Plan_and_Timetable_CBR.pdf, approved by Canadian Border Public Notice.

SMR licensees. Stage 2 is comprised of both NPSPAC and non-NPSPAC Public Safety licensees. The TA continued its efforts to support Canadian border region reconfiguration during the fourth quarter by using the mediation process to assist licensees and Sprint Nextel in negotiating PFAs and FRAs and by hosting an Interoperability and Planning Workshop with licensees in Michigan.

a. **Frequency Proposals**

In the fourth quarter of 2009, the TA analyzed and proposed 9,067 additional replacement frequencies for Canadian border region Stage 2 licensees, with most of these being the final proposals to complete planning for two large licensees. These proposals completed the identification of replacement frequencies for all Canadian border affected licensees. Going forward, frequency planning activities in this area are anticipated to involve addressing issues (such as combiner spacing) raised by licensees and providing replacement frequencies for STAs granted after the initial planning was completed. Additional information about Frequency Proposal Reports ("FPRs") is provided in Appendix 5.

b. **Planning**

Stage 1 or 2 licensees seeking planning funding were required to submit a Request for Planning Funding by the October 14, 2008 deadline established by the FCC and negotiate a PFA with Sprint Nextel. As of December 31, 2009, 67 PFAs, with a total contract value of \$13.8 million, were submitted to the TA by licensees in or adjacent to the Canadian border regions.

After reaching agreement on a PFA, licensees and their vendors conduct planning activities, such as system inventory, frequency analysis, and development of a reconfiguration plan, and prepare a cost estimate for their reconfiguration. Licensees are required to complete planning and submit a cost estimate to Sprint Nextel within 90 to 110 days, depending on the number of subscriber units in their system, of the *later* of TA approval of the PFA or receipt of an FPR. If a licensee needs additional time to complete planning, it should request an extension from the PSHSB.

Once a licensee's planning is complete and a cost estimate is submitted to Sprint Nextel, the licensee and Sprint Nextel will have 30 days for FRA negotiations. If they are unable to negotiate an FRA within the 30-day period, the parties will actively participate in mediation for 20 days.

c. **Negotiations**

Substantial progress has been made in the negotiation of FRAs for licensees in the Canadian border regions. The table below provides information about the status of FRA negotiations and approval.

Table 3: Status of FRA Negotiations for Canadian Border Licensees as of December 31, 2009

Stage	By number of FRAs					By number of Call Signs				
	Anticipated Total	Submitted to TA		Approved by TA		Total	Submitted to TA		Approved by TA	
		#	%	#	%		#	%	#	%
Stage 1	85	67	79%	58	68%	273	170	62%	145	53%
Stage 2	130	61	47%	54	42%	1540	133	9%	106	7%
Total	215	128	60%	112	52%	1813	303	17%	251	14%

Appendices 1B and 3B provide additional information about the status of FRA negotiations for Canadian border licensees.

(i) **Stage 1**

Most Canadian border Stage 1 licensees included planning costs (if any) in their FRAs. Seven Stage 1 licensees negotiated PFAs and are in various stages of the planning or FRA negotiation process.

The majority of Stage 1 licensees without a PFA were required to submit a cost estimate by January 12, 2009. The expedited negotiation and mediation period for Canadian border region Stage 1 licensees without a PFA began on January 12, 2009. After submitting a cost estimate, a licensee and Sprint Nextel had 30 days to negotiate an FRA under the monitoring of a TA mediator. If, at the end of the 30-day period, there was no agreement on an FRA, the licensee and Sprint Nextel actively participated in mediation for 20 days.

As of December 31, 2009, of the 129 mediation dockets opened for Stage 1 licensees, 113 mediation dockets had been resolved (an increase from 106 resolved as of September 30, 2009). The parties in five mediations had negotiated PFAs and were in various stages of planning. The parties in two mediations had reached agreement but had not yet executed FRAs. No mediation dockets were pending before the FCC for *de novo* review.

During the fourth quarter, parties completed negotiations on and submitted to the TA an additional 2 FRAs for Stage 1 licensees. As of December 31, 2009, 67 FRAs (79 percent) were submitted to the TA out of the 85 FRAs anticipated for Canadian border region Stage 1 licensees. The contract value of these FRAs, including amendments, totals \$5.3 million.

(ii) **Stage 2**

Nearly half of the Canadian border Stage 2 licensees submitted an RFPPF and negotiated a PFA. These licensees are currently engaged in activities to plan for their reconfigurations and prepare reconfiguration cost estimates, and some licensees have already submitted cost estimates and entered into FRA negotiations with Sprint Nextel.

For Canadian border region Stage 2 licensees that do not require a PFA, the expedited negotiation and mediation period began on April 15, 2009. After submitting a cost estimate, a

licensee and Sprint Nextel had 30 days to negotiate an FRA under the monitoring of a TA mediator. If, at the end of the 30-day period, there was no agreement on an FRA, the licensee and Sprint Nextel actively participated in mediation for 20 days.

As of December 31, 2009, of the 156 mediation dockets opened for Stage 2 licensees, 95 mediation dockets had been resolved (an increase from 66 resolved as of September 30, 2009). The parties in one mediation had reached agreement but had not yet executed a PFA. The parties in 49 mediations had negotiated PFAs and were in various stages of planning; six of these had reached agreement but had not yet executed FRAs. The parties in 8 mediations in which the licensee did not have a PFA had reached agreement but had not yet executed FRAs. No mediation dockets were pending before the FCC for *de novo* review.

During the fourth quarter, parties completed negotiations on and submitted to the TA an additional 20 FRAs for Stage 2 licensees. As of December 31, 2009, 61 FRAs (46 percent) were submitted to the TA out of the 130 FRAs anticipated for Canadian border region Stage 2 licensees. The contract value of these FRAs, including amendments, totals \$19.7 million.

d. **Reconfiguration Implementation**

While a number of Canadian border FRAs have been submitted to and approved by the TA, reconfiguration implementation is still getting underway for Canadian border licensees. A number of licensees, especially Stage 1 licensees, are moving forward with, and in some cases completing, their implementation activities.

(i) **Stage 1**

During the fourth quarter, there were an additional 18 Canadian border Stage 1 FRAs for which licensees reported their physical retunes as complete. As of December 31, 2009, there were 36 Canadian border Stage 1 FRAs for which licensees had completed their physical retunes and transitioned to their new channels. As of December 31, 2009, physical retuning was complete for 42 percent of Canadian border Stage 1 FRAs (an increase from 21 percent from September 30, 2009).

The map below shows the progress of Stage 1 licensees in the Canadian border regions as many licensees moved from the negotiation phase to the implementation phase.

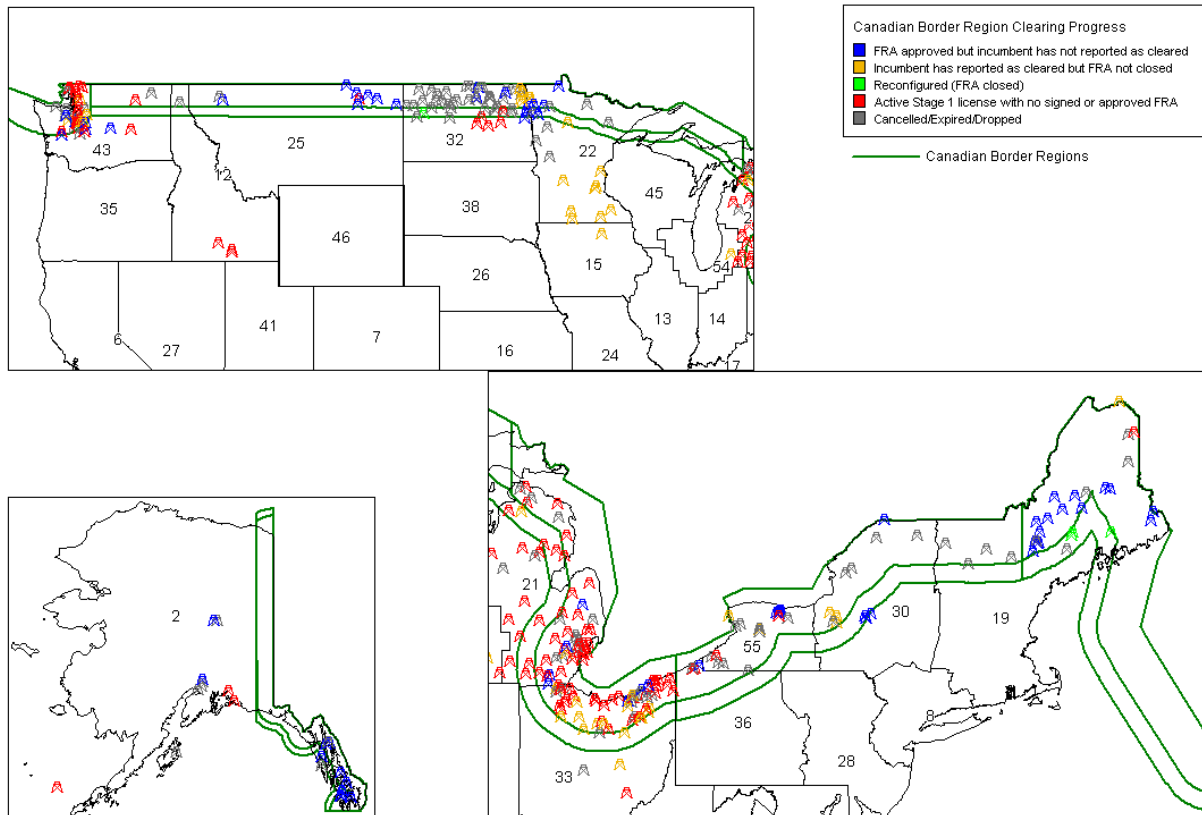

Map 4: Canadian Border Region Stage 1 Clearing Progress

800 MHz Reconfiguration Progress

(c) 2010, 800 MHz Transition Administrator, LLC
02/16/10

Canadian Border Regions, Stage 1 Site-specific Call Signs

Clearing Progress and Call Sign location as of 12/31/09 (Q4 2009)

(ii) Stage 2

Reconfiguration of Stage 2 Public Safety licensees, often with complex system designs and interoperability requirements among numerous licensees in a region, requires more time and coordination than is needed for Stage 1 reconfiguration. Furthermore, certain Stage 1 licensees need to complete their physical reconfiguration in order to clear replacement channels for Stage 2 licensees. Stage 2 licensees have commenced, and, in some cases, completed implementation activities. During the fourth quarter, there were an additional 6 Canadian border Stage 2 FRAs for which licensees reported their physical retunes as complete. As of December 31, 2009, there were 8 Canadian border Stage 2 FRAs for which licensees had completed their physical retunes and transitioned to their new channels. As of December 31, 2009, physical retuning was complete for 6 percent of Canadian border Stage 2 FRAs (an increase from 1 percent from September 30, 2009).

The map below shows the implementation progress of Stage 2 licensees in the Canadian border regions.

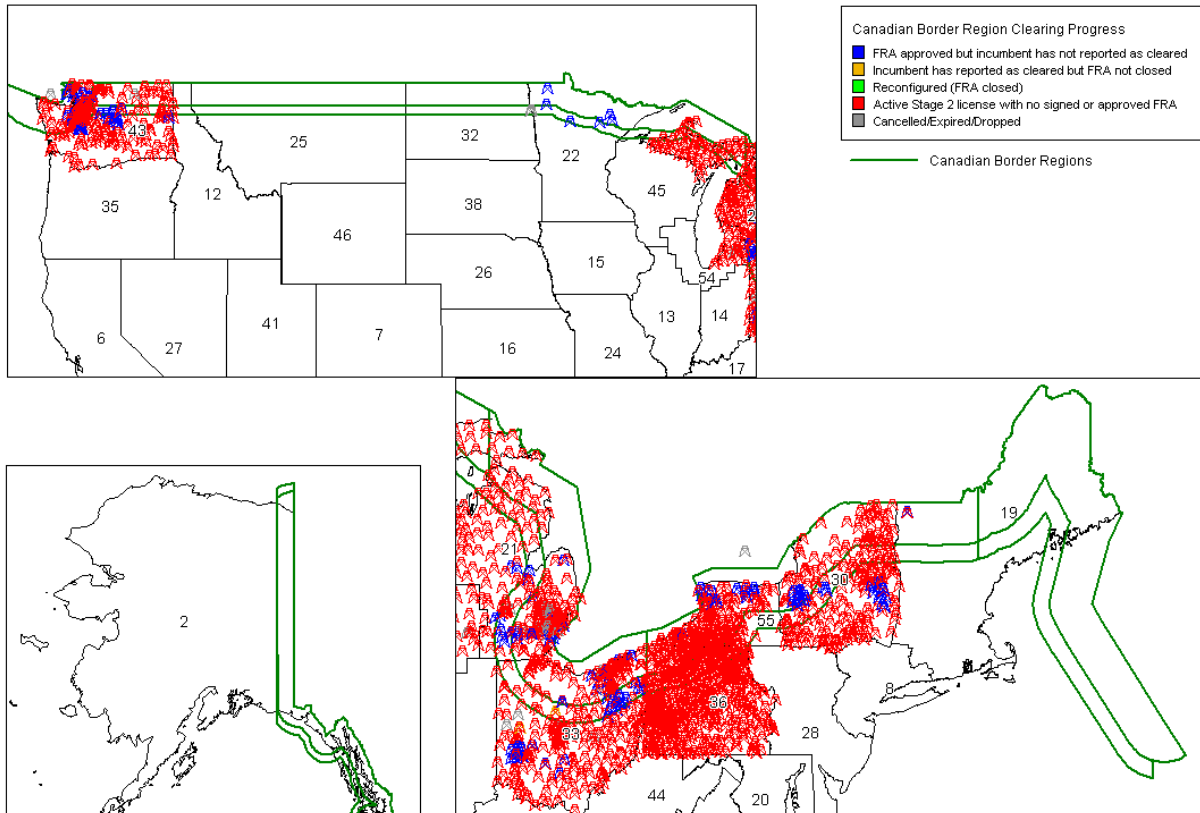

Map 5: Canadian Border Region Stage 2 Clearing Progress

5. Change Notices and Amendments

When a licensee encounters an emergency or other unanticipated need to change the scope or cost of its planning or reconfiguration implementation activities after it has signed its TA-approved PFA or FRA, it must submit a Change Notice request to Sprint Nextel and the TA. The TA encourages licensees to use the Change Notice Form available on the TA's website when submitting a Change Notice request.³⁵ Note that a Change Notice applies only to costs and other circumstances that arise from an emergency or otherwise could not have been reasonably anticipated before the PFA or FRA, as applicable, was signed. Change Notices generally seek modifications to the services, equipment, or accessories provided for in the PFA or FRA, and the associated costs. A licensee should receive approval of a Change Notice by Sprint Nextel and the TA before incurring the costs sought in a Change Notice. Until the additional costs are agreed with Sprint Nextel and reviewed and approved by the TA, the licensee bears the risk that the additional costs will not be reimbursed by Sprint Nextel.

³⁵ The form is available at http://www.800TA.org/content/resources/Change_Note_Form.doc.

During the fourth quarter of 2009, licensees submitted 165 Change Notices, which is equal to the number of Change Notices submitted during the third quarter of 2009. Some Change Notices are resolved quickly, but others can take time to negotiate and result in an amendment to the PFA or FRA which must be submitted to the TA for approval. In some cases, the TA uses the mediation process to assist licensees and Sprint Nextel in reaching agreement on Change Notices. During the fourth quarter of 2009, licensees and Sprint Nextel negotiated and submitted to the TA 118 amendments (a decrease from 130 amendments submitted in the third quarter of 2009).

B. Program Financial Information

This section provides information for the fourth quarter of 2009 regarding reconfiguration expenditures, letter of credit, the external audit, the TA's fees and expenses, and the closing process and reconfiguration Completion Certifications.

1. Reconfiguration Expenditures

a. 800 MHz Incumbent Licensee Reconfiguration Costs

As of December 31, 2009, Sprint Nextel and incumbent licensees had executed FRAs and PFAs pursuant to TA-approved cost estimates totaling approximately \$796.3 million, and Sprint Nextel had paid approximately \$412.9 million of this amount as advance payments and for work completed to date. This compares to \$751.2 million in executed FRAs and PFAs and \$374.3 million paid as of September 30, 2009.

Sprint Nextel has reported to the TA that, as of December 31, 2009, it had incurred, on a cash basis, approximately \$1,077.7 million in costs for: (1) payments made to incumbent licensees or their vendors in accordance with TA-approved agreements executed by incumbent licensees and Sprint Nextel; and (2) replacement equipment costs, including costs related to the development of software for certain incumbent licensee subscriber equipment that enables such subscriber equipment to be retuned rather than replaced and costs related to replacement equipment to be provided to incumbent licensees by Sprint Nextel (collectively "800 MHz Incumbent Licensee Reconfiguration Costs"). To date, Sprint Nextel had requested that the TA assess approximately \$451.7 million of the 800 MHz Incumbent Licensee Reconfiguration Costs (submitted as of September 30, 2009) for the purpose of determining whether those costs are creditable against the payment Sprint Nextel will make to the United States Treasury at the completion of reconfiguration ("Creditable Costs"). The status of these costs is as follows:

- \$356.3 million was determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$95.4 million requires additional information from Sprint Nextel or incumbent licensees to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$626.0 million of the 800 MHz Incumbent Licensee Reconfiguration Costs to the TA for credit assessment or for external audit. The \$626.0 million consists primarily of advance payments for equipment, and such costs are not submitted until the equipment is attributed to a particular licensee and that licensee completes its reconfiguration and cost reconciliation.

b. **Sprint Nextel Costs**

Sprint Nextel has reported to the TA that, as of December 31, 2009, it had incurred, on a cash basis, approximately \$286.3 million in costs to support: (1) incumbent licensee negotiations; (2) systems development costs for tracking and reporting of program activity, (3) Sprint Nextel's program and financial management activities; (4) other program costs; and (5) reconfiguration of Sprint Nextel's systems in the 800 MHz band (collectively "Sprint Nextel Costs"). The Sprint Nextel Costs exclude certain amounts incurred related to Sprint Nextel's internal network costs that Sprint Nextel may submit for credit at a later date ("To Be Determined Sprint Nextel Costs"). To date, Sprint Nextel has requested that the TA assess approximately \$239.7 million of the Sprint Nextel Costs (submitted as of September 30, 2009) for the purpose of determining whether those costs are Creditable Costs. The TA has analyzed approximately \$229.6 million in costs (submitted as of December 31, 2008). The status of these costs is as follows:

- \$65.8 million was determined by the TA to be Creditable Costs pending the Final Accounting to be performed at completion of reconfiguration and the results of the external audit.
- The remaining \$163.8 million requires additional information from Sprint Nextel to determine whether these costs are creditable.

Sprint Nextel has not submitted the remaining \$46.6 million of the Sprint Nextel Costs or any of the To Be Determined Sprint Nextel Costs to the TA for credit assessment or for external audit.

c. **1.9 GHz Clearing Costs**

Sprint Nextel has reported to the TA that, as of December 31, 2009, it had incurred approximately \$699.1 million in costs associated with reconfiguration of the 1.9 GHz band. These costs are reported for informational purposes only. The TA does not conduct an analysis of these costs.

d. **Estimated Total Reconfiguration Expenditures**

On February 26, 2010, Sprint Nextel filed with the Securities and Exchange Commission ("SEC") its Annual Report on Form 10-K for the fiscal year ended December 31, 2009 and disclosed that from the inception of the program through December 31, 2009, Sprint Nextel has

incurred approximately \$2.4 billion of costs directly attributable to the spectrum reconfiguration program.³⁶

2. Letter of Credit

For the quarter ended December 31, 2009, Sprint Nextel made its required payments to licensees and vendors. Accordingly, there has been no need to draw on the Letter of Credit through December 31, 2009. Sprint Nextel has reported to the TA that, as of December 31, 2009, it had incurred, on a cash basis, approximately \$118.6 million in Letter of Credit Fees.

The TA has continued to monitor the amount of the Letter of Credit in view of Sprint Nextel's programmatic obligations. On October 15, 2009, the TA recommended that the Letter of Credit be reduced by \$113.5 million based on costs paid through March 31, 2009. The FCC concurred with the TA's request on November 18, 2009, and the Letter of Credit was reduced from \$1.782 billion to \$1.668 billion. On December 10, 2009, the TA recommended that the Letter of Credit be reduced by \$82.0 million based on costs paid through June 30, 2009. The FCC concurred with the TA's request on March 12, 2010, and the Letter of Credit was reduced from \$1.668 billion to \$1.586 billion.

3. External Audit

In the fourth quarter of 2009, Reznick Group, the external auditors selected by the TA, continued the annual audit of program expenditures for the year ended December 31, 2009 and for the period from inception (August 6, 2004) through December 31, 2009 ("the 2009 Audit").

4. Transition Administrator

a. Fees, Expenses, and Staffing

The TA's fees and expenses for the quarter ended December 31, 2009 were approximately \$8.4 million in fees and approximately \$0.1 million in expenses, for a total of approximately \$8.5 million, which is approximately \$0.3 million less than the forecast for the fourth quarter. Additional details are provided in Appendix 9. TA staffing as of December 31, 2009 consisted of 67 Full Time Equivalents ("FTEs").

The TA's fees and expenses for the quarter ending March 31, 2010 are estimated at \$8.5 million in fees and \$0.2 million in expenses, for a total of \$8.7 million.

b. Disclosure of Non-Reconfiguration Fees

In accordance with the TA's Independence Management Plan, the TA reports that Deloitte LLP received \$113,803 from Sprint Nextel in non-TA fees and costs for the quarter ended December 31, 2009.³⁷

³⁶ See Sprint Nextel Corporation, Annual Report (Form 10-K), at 46 (filed Feb. 26, 2010), available at <http://www.sec.gov/Archives/edgar/data/101830/000119312510042491/d10k.htm>.

5. Closing Process and Reconfiguration Completion Certifications

After licensees complete planning activities or physical reconfiguration, they must close their PFA or FRA with Sprint Nextel. The closing process ensures that both parties have met all of their obligations. For FRAs, the closing process consists of the following activities:

1. License Modification – The modification of the licensee’s FCC licenses to delete old frequencies.
2. Equipment Reconciliation – The true up of all loaned, replaced, and replacement equipment.
3. Actual Cost Reconciliation (“ACR”) – The true up of cost support with amounts paid or to be paid by Sprint Nextel.
4. Closing – The preparation, execution, and delivery of the closing documents, including an FRA Completion Certification.

The ACR Process helps ensure that all of the licensee’s costs are supported by sufficient documentation. During the ACR Process, a licensee provides Sprint Nextel with supporting documentation for the actual costs incurred for its planning or reconfiguration, and Sprint Nextel validates the costs incurred and performs a true-up of the actual costs as compared to the estimated costs in the PFA or FRA. The result is an ACR Statement documenting the actual costs incurred and payments made to the licensee, including the final payment to the licensee or any refunds due Sprint Nextel.

Once the ACR Statement is complete, Sprint Nextel sends the licensee closing documents, including a Completion Certification. A licensee is required by its PFA or FRA to execute and return the closing documents to Sprint Nextel.

The PFA Completion Certification indicates that all work required to plan for the reconfiguration of the licensee’s facilities has been satisfactorily completed and that the licensee and Sprint Nextel have agreed on the amount paid by Sprint Nextel for such work. During the fourth quarter of 2009, 20 PFA Completion Certifications were submitted to the TA, increasing the total submitted to 198.³⁷ Of these, the TA reviewed and found 197 PFAs complete, subject to post-close audit adjustments, with the remaining one under review as of December 31, 2009. Appendix 8 contains a summary of PFAs that have closed as of December 31, 2009.

The FRA Completion Certification certifies that the licensee has relinquished its original 800 MHz frequencies and reconfigured its facilities to operate on replacement frequencies; that all reconfiguration work required has been satisfactorily completed; and that the licensee and Sprint Nextel have agreed on the amount paid by Sprint Nextel for such work. A licensee’s

³⁷ See “Independence Management Plan for 800 MHz Transition Administrator Team Members (Version 1.3),” at 4, attached to Letter from Robert B. Kelly, Squire, Sanders & Dempsey L.L.P., to Marlene H. Dortch, Secretary, FCC, WT Docket No. 02-55 (filed Dec. 30, 2009).

³⁸ Of these, 24 were for Stage 1 licensees and 174 were for Stage 2 licensees.

reconfiguration is not complete until this certification has been executed and delivered by the licensee. During the fourth quarter of 2009, 41 FRA Completion Certifications were submitted to the TA, increasing the total submitted to 1,023.³⁹ Of these, the TA reviewed and found 1,009 FRAs complete, subject to post-close audit adjustments, with the remaining 14 under review as of December 31, 2009. Appendix 8 contains a summary of FRAs that have closed as of December 31, 2009.

The TA verified the amounts expended on activities for the above-referenced PFAs and FRAs, pending any results of the TA's post-close review rights or external audit, to ensure (1) that the amounts paid by Sprint Nextel do not exceed TA-approved contract amounts, and (2) that the reconciliation ("true-up") of any additional amount due to the licensee or its vendor or any refund due Sprint Nextel, as determined by Sprint Nextel and the licensee, is properly reflected in the 800 MHz accounting records and is consistent with payments made.

Sprint Nextel provided the TA with the following data regarding the status of FRAs in each stage of the closing process as of December 31, 2009. As outlined in Table 4, there continues to be significant delays between the time licensees complete physical reconfiguration and the closing of the FRA. Since the beginning of the program, the closing process has taken an average of 11.4 months to complete following the completion of physical reconfiguration. For those licensees that have completed physical reconfiguration but have not closed the FRA as of December 31, 2009, an average of 14.7 months has elapsed since the completion of the physical reconfiguration.

³⁹ Of these, 817 were for Stage 1 licensees and 206 were for Stage 2 licensees.

**Table 4: Status of FRAs in the Closing Process
Following Completion of Physical Reconfiguration⁴⁰**

Status of FRAs Activity to be Completed	Quantity	Time Elapsed Since Physical Retune Complete					% Greater than or Equal to 12 Months
		Less than 3 Months	3 to 6 Months	6 to 9 Months	9 to 12 Months	12 Months or Longer	
Equipment Reconciliation	160	31	20	29	16	64	39.5%
License Modification	5	1	0	0	0	4	2.5%
Actual Cost Reconciliation Process *	110	17	17	15	8	53	32.7%
Closing	59	3	9	6	0	41	25.3%
Total FRAs Pending TA Completion Certifications	334	52	46	50	24	162	
Closed FRAs **	1,023						
Total FRAs for which physical reconfiguration is complete	1,357						

* Includes 27 FRAs that are also pending License Modification.

** Includes 14 FRAs that are pending TA review of the TA Completion Certifications.

It is very important for licensees and Sprint Nextel to complete the closing process in a timely manner. In the updated Actual Cost Reconciliation Fact Sheet, which was posted on the TA's website in December 2009, the TA suggested specific timeframes by which licensees and Sprint Nextel are encouraged to complete ACR and the other closing activities. To minimize the effort and times associated with the closing process, licensees should also review the following TA guidance: the Change Notice Process Fact Sheet, the Incumbent Labor Reimbursement Policy, and the Reconfiguration Completion Checklist. Each of these documents is available on the TA's website at www.800TA.org. In addition, the TA holds Webinars (online training seminars) regarding closing process topics, such as Actual Cost Reconciliation and Reconfiguration Completion, to assist licensees in understanding the process from start to finish.⁴¹ The TA will continue to monitor the closing process, and make inquiries of licensees and Sprint Nextel, to ensure adherence to the timelines and guidance.

C. Specialized Support Functions

This section outlines additional information about TA activities that support the program, such as the Contact Center, the website, outreach, and FRA review.

⁴⁰ Sprint Nextel is the data source for this table.

⁴¹ Information about Webinars is available at <http://www.800TA.org/content/ipswebinars>.

To facilitate successful 800 MHz band reconfiguration, licensees and other stakeholders must have rapid and consistent access to accurate reconfiguration information, processes, and procedures. As such, the TA executes an approach that is intended to engage, educate, and equip the impacted stakeholders with the knowledge necessary to plan and implement reconfiguration activities. The TA employs a multi-pronged approach, including direct calling campaigns, conference and event attendance (“Stakeholder Outreach”), Webinars (online training seminars), and interaction with industry press to accomplish these goals.

1. Stakeholder Inquiries

The TA maintains a “Contact Center” to receive and process questions and requests for information regarding reconfiguration and the TA’s activities. The TA receives inquiries from a variety of stakeholders: licensees, vendors, consultants, associations, and the trade press. During the fourth quarter, the TA received a total of 4,556 inquiries to the Contact Center (1,366 in October 2009; 1,341 in November 2009; and 1,610 in December 2009).

Several parties have contacted the TA regarding possible investment opportunities in 800 MHz band spectrum following reconfiguration. The TA has no role in the allocation of frequencies following the completion of the 800 MHz band reconfiguration. The TA does not provide advice on investments, acquisitions, or usage of licenses in the 800 MHz band. Parties interested in such matters may wish to consult the FCC’s rules and regulations and visit the FCC’s website relating to the 800 MHz band at <http://www.fcc.gov/pshs/public-safety-spectrum/800-MHz/>.

2. TA-Produced Materials and the TA’s Website

During the fourth quarter, the TA continued to distribute informational materials to stakeholders relating to the reconfiguration process, including fact sheets, licensee forms, direct mailings, and other materials as listed below. Many of these items are posted on the TA’s website (www.800TA.org).

- Guidance for Filing a Supplemental Request for Waiver to Complete a Second Touch – The TA created a Fact Sheet containing guidance and instructions for licensees that need to file a supplemental request for waiver of the rebanding completion deadline because they have not completed a second (or subsequent) touch to remove the pre-rebanding channels from their subscriber units.
- Forms and Fact Sheets – Created or updated and posted several documents, including an updated Actual Cost Reconciliation Fact Sheet and Frequently Asked Questions on requests for waiver of the rebanding completion deadline.
- Cost Metrics – The TA published, on its website, monthly updates to the FRA Cost Metrics, which identify statistical measures of licensee reconfiguration implementation costs and rates based on system size.
- Webinars – The TA posts audio-visual recordings of its Webinar presentations on the TA’s website following each Webinar session. These recordings are available at <http://www.800ta.org/content/ipswebinars/>

- TA Alerts – TA Alerts are the TA’s listserv feature, which allows website visitors to sign up to receive emails from the TA with the latest updates and news. TA Alerts are sent when changes or updates are made to the website, when the FCC releases an Order or Public Notice, and/or when the TA has an announcement. There are 329 subscribers for TA Alerts. In the fourth quarter of 2009, the TA sent four TA Alerts.

These new or modified materials, in addition to materials previously published, are intended to provide stakeholders with sufficient information to effectively plan, negotiate, and implement reconfiguration.

During the fourth quarter, the TA also submitted a rebanding newsletter for use in the Association of Public-Safety Communications Officials’ (“APCO’s”) November 2009 issue. The TA provides articles to various Public Safety communications publications as another medium to communicate with licensees and to educate those involved in the rebanding process.

The TA’s website is a significant component of the Stakeholder Outreach efforts. During the fourth quarter, updates were made to the TA’s website to post and advertise new and updated TA-produced materials and guidance for licensees, and to post copies of FCC Public Notices and Orders. The TA’s website received an estimated 9,752 visits during the fourth quarter.⁴²

3. Outreach Events and TA-Sponsored Education and Training

The TA has continued to conduct Webinars that provide information on all facets of reconfiguration. In the fourth quarter, the TA offered six Webinars sessions on the following topics: Actual Cost Reconciliation; TA Review Rights (available specifically for licensees selected for the process); and Payment Process. The Payment Process Webinar was a new webinar topic, targeting licensees whose questions and concerns were not addressed in the ACR or Review Rights Webinars. In the first quarter of 2010, the TA is scheduled to offer additional Webinars on these topics, as well as Webinars on Preparing for IPS.

Webinars have proven to be an effective, low-cost method for reaching wide audiences and providing interactive and just-in-time guidance. The TA solicited feedback following each delivery. According to participant surveys, reaction to the Webinars has been overwhelmingly positive, with participants indicating that the opportunity for live discussion is the most helpful aspect.

4. Frequency Reconfiguration Agreement Review

The TA continues to meet its service-level goals for reviewing FRAs.⁴³ Detailed information about the time required by the TA to review and approve Stages 1 and 2 FRAs submitted to the TA is available in Appendices 6 and 7.

⁴² The TA has adopted “visits” instead of “hits” as a more accurate metric to utilize in identifying website traffic.

⁴³ The TA’s service-level targets for FRA review are review of 80 percent of FRAs within 5 business days, 95 percent within 10 business days, and 100 percent within 15 business days.

III. APPENDICES

Appendix 1A

Status of Reconfiguration for Non-Border Licensees in Channels 1-120: Milestones Completed by Number of Frequency Reconfiguration Agreements, Per Wave, Per Region, as of December 31, 2009

Notes:

* Data includes call signs in the international border area. Data may change depending upon border area band plans.

a. Data for Channels 1-120 call signs does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.

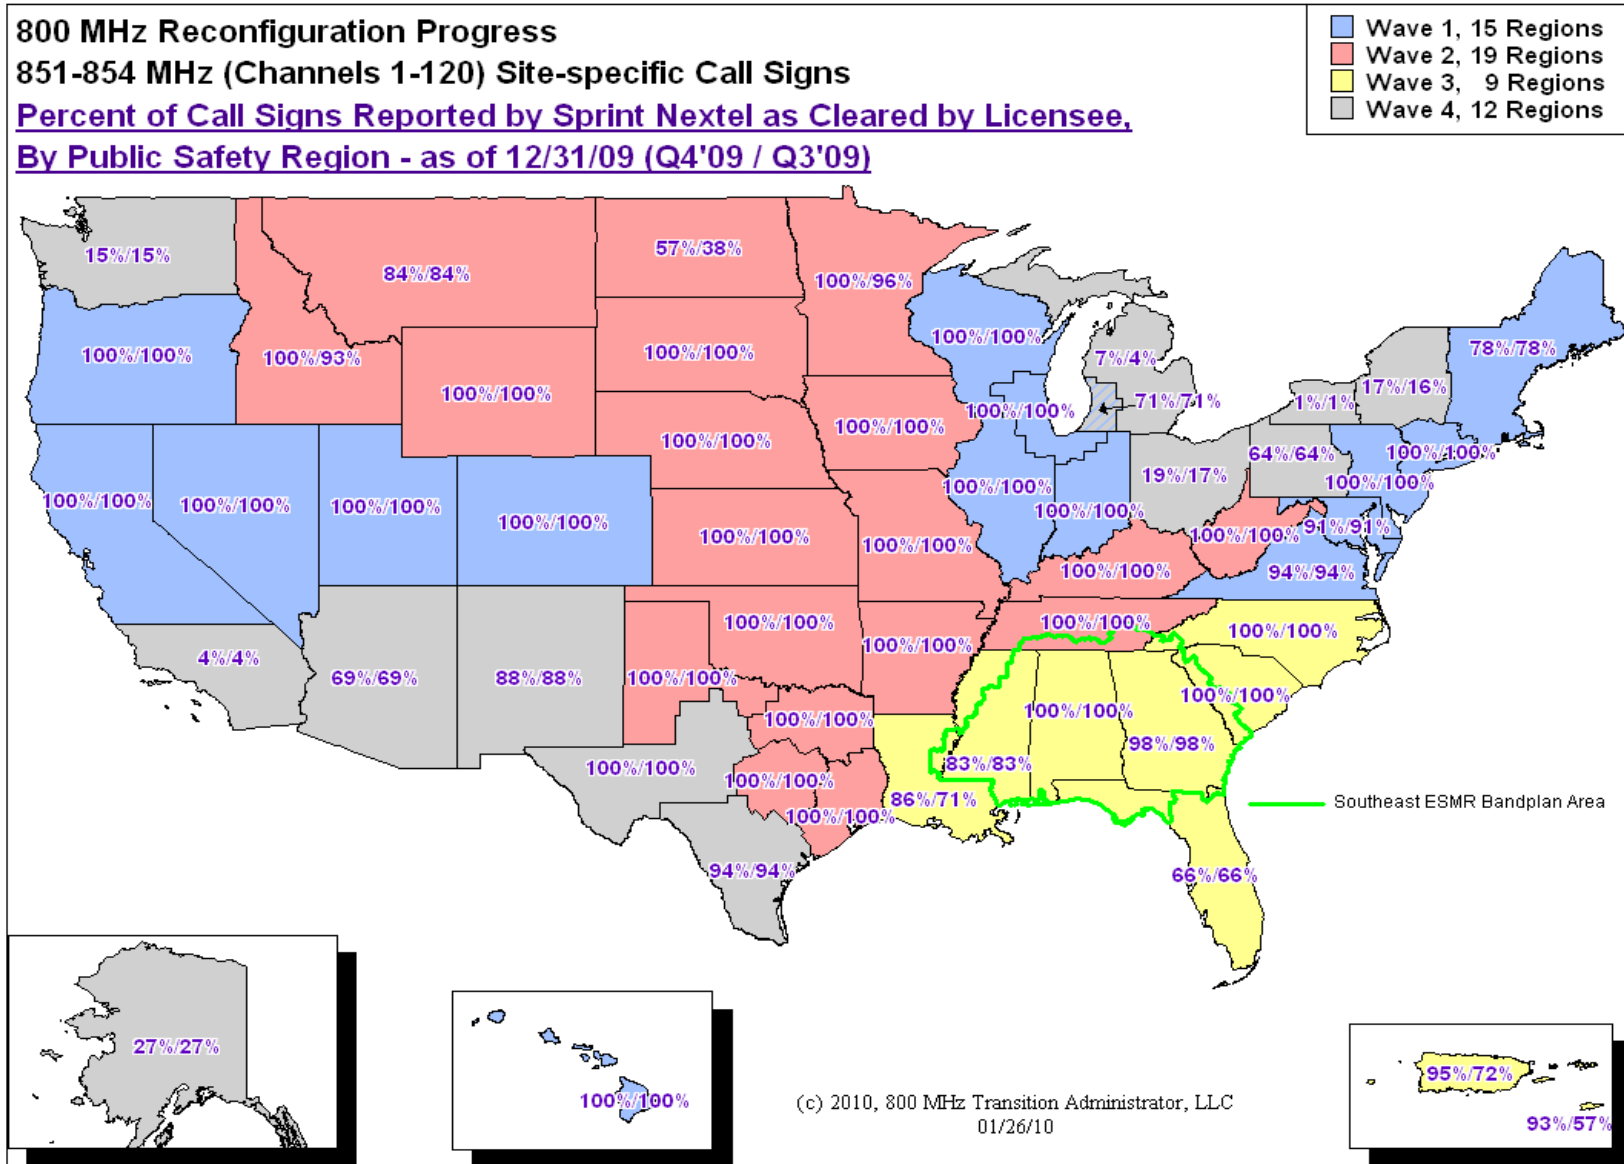

b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.

c. Data includes call signs with fixed locations authorized for frequencies in the 851-854 MHz range with adequate geographic data to determine a Public Safety Region.

d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.

e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.

f. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

The licensee clearing information is provided by Sprint Nextel. Regions adjacent to international borders will not reach 100 percent until revised border area band plans are available.

Notes:

* Data includes call signs in the international border area. Data may change depending upon border area band plans.

a. Data does not include call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts will not be submitted to the TA for review and approval for Sprint Nextel credit.

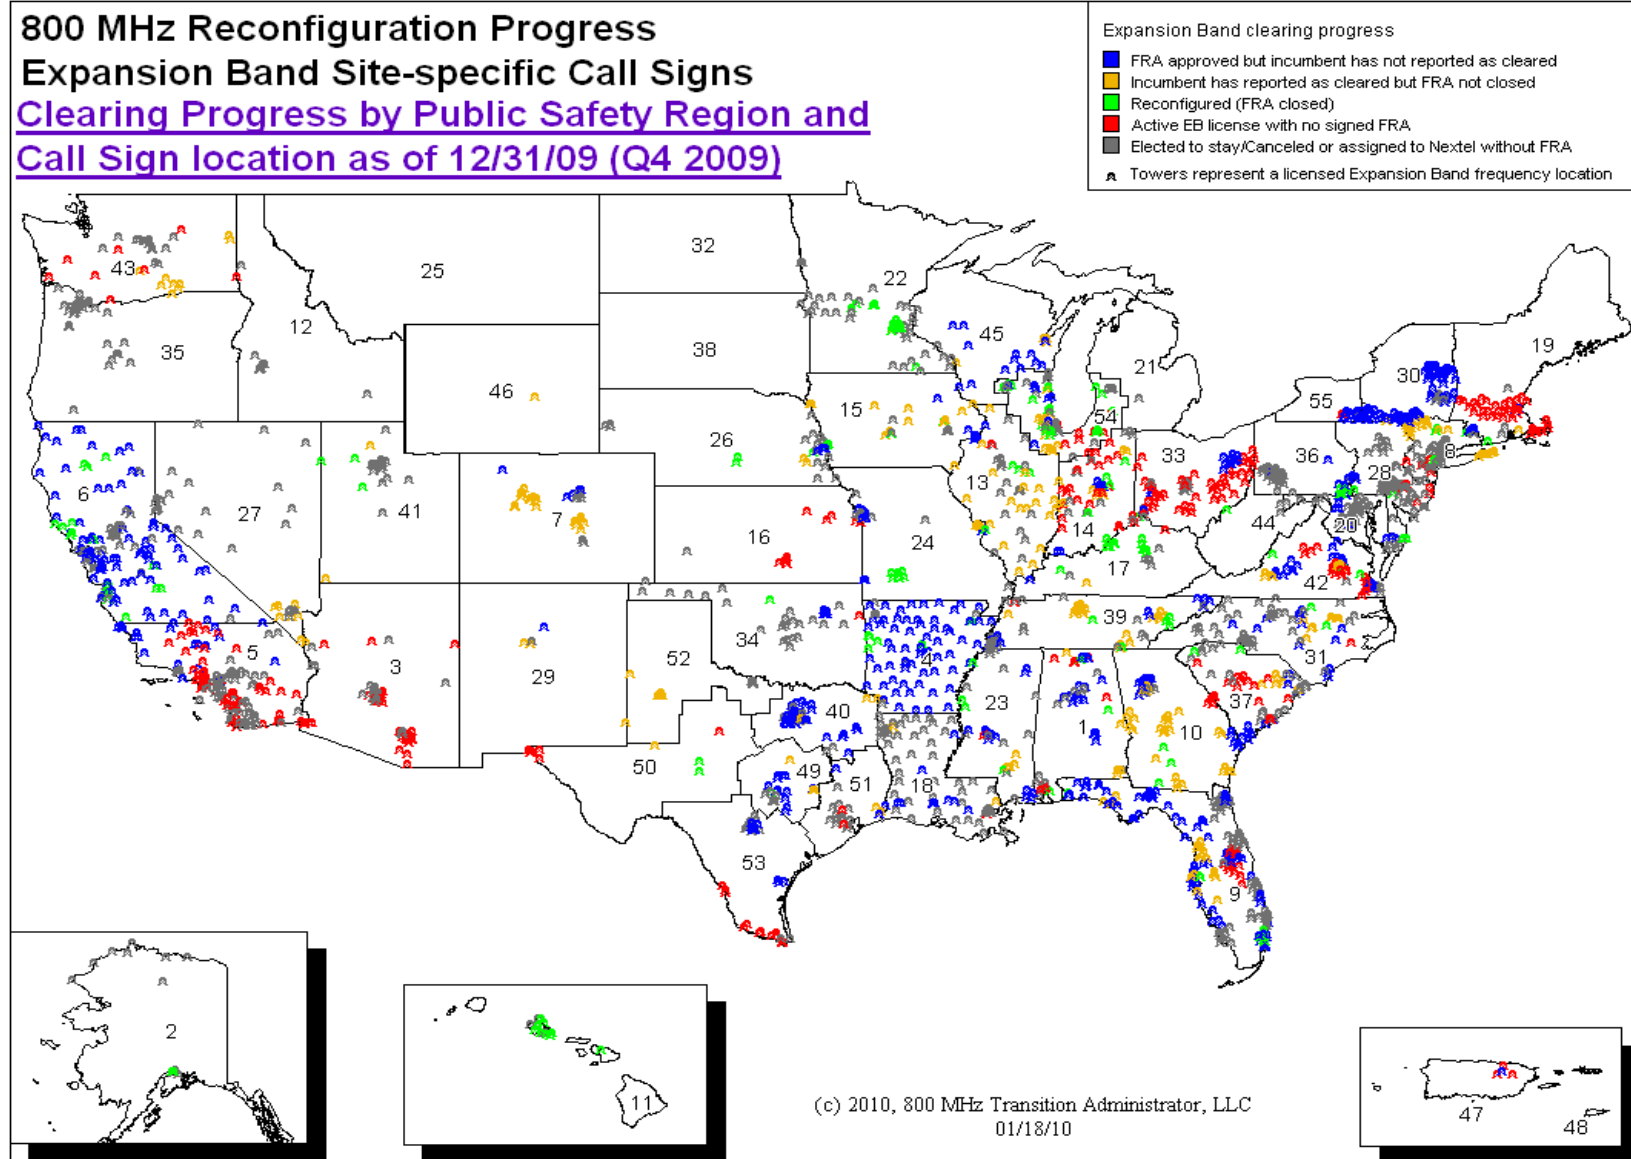

b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.

c. Data includes call signs with fixed locations authorized for frequencies in the 866-869 MHz range, and those with adequate geographic data to determine a Public Safety Region.

d. Data for the call sign population and applications may not match data for Sprint Nextel milestones due to call signs expiring or being cancelled without contracts. In addition, certain FRAs may include call signs undergoing reconfiguration that may be cancelled or assigned without frequencies being changed on that particular call sign. Call signs with old frequencies being deleted via a partial assignment are not included in the delete application data.

e. Data between Incumbent Clear and Notify and Surrender Applications Submitted to FCC do not always match due to partial assignment applications filed in advance of frequency clearing to expedite the process and occasional time lags in the reporting on licensee frequency clearing.

f. As of the second quarter of 2007, the NPSPAC call sign data includes STA NPSPAC call signs and call signs without fixed locations (e.g., mobile-only authorizations).

g. Incumbent Clear and Notify counts may exceed Sprint Nextel Cleared counts in certain PSRs due to Sprint Nextel data entry delays; incumbents clearing by cancelling licenses for which Sprint Nextel would not need to clear frequencies; or the replacement channels were not currently in operation in Sprint Nextel's network.

Appendix 2
Status of NPSPAC Channels
Cleared, Per Region, Per Wave as of December 31, 2009

Public Safety Region (PSR)	PSR Name	Wave	Cleared NPSPAC Channels (25 kHz equivalents)	Percentage Clear	Percentage Encumbered	Relinquishment Stage Attained

Note:

(a) For Non-Canadian Border PSR 15, a call sign has frequencies in both PSR 15 and PSR 22. The reconfiguration of the frequencies on this call sign in PSR 22 necessitated the reconfiguration of the same frequencies in PSR 15.

Notes:

- a. Data for Channels 1-120 call signs excludes call signs that were under contract with Sprint Nextel prior to the start of reconfiguration and for which contracts are not going to be submitted to the TA for review and approval for Sprint Nextel credit. Data for Expansion Band call signs excludes call signs under prior contract and call signs for which licensees have elected not to reconfigure.
- b. The current population of call signs has been adjusted for call signs cancelled without a Frequency Reconfiguration Agreement (FRA), and incremented for any call signs added through pending applications. Licensees may cancel licenses or let them expire without entering into an FRA.
- c. Data for Channels 1-120 call signs includes call signs with at least one primary fixed location authorized for frequencies the 851-854 MHz range with adequate geographic data to determine a PSR. Expansion Band data includes call signs with at least one primary fixed location in the Expansion Band, as the Expansion Band may be defined inside and outside the Southeast ESMR region, with adequate geographic data to determine a PSR. NPSPAC data includes call signs with fixed locations in the 866-869 MHz range with adequate geographic data to determine a PSR. Southeast ESMR Band data includes call signs with fixed locations in the 858.5-862 MHz range within the Southeast ESMR region and with adequate geographic data to determine a PSR. Call signs with locations in multiple PSRs are counted for each PSR. Call signs are counted within every PSR for which they have a fixed primary location.
- d. Data has been adjusted to reflect the change in the band plan in the Atlanta area pursuant to the FCC's October 5, 2005 Memorandum Opinion and Order.
